COMMUNITY OF PRACTICE ON
HIGHLY HAZARDOUS PESTICIDES
Organized by the SAICM Secretariat and the University of Cape Town

- **Topic:** Implementation mechanisms of the Global Action Plan on HHPs. Part 1 – The targets of global action plan on HHPs and role of the stakeholders in the implementation mechanism
- **Date:** 10 February 2021
- **Time:** 14H00 PM – 15H30 PM SAST (GMT + 2.00)
- **Presenter:** Ms Beatrice Grenier (FAO)
- **Facilitator:** Prof Andrea Rother, University of Cape Town
- **Chair:** Ms Tatum Louw, University of Cape Town

Introduce yourself (name, job title, organization and country) in the chat section.

**Only** the presenter and facilitator will speak. Any comments or questions from attendees should be typed in the chat section.

Please kindly keep you microphone muted and cameras off during the discussion.

**NOTE:**
If you are having technical issues, please join the HHP WhatsApp group, using this link, and we will assist you; [https://chat.whatsapp.com/JFBuA0TRuRZ0NAqm8JHpp0](https://chat.whatsapp.com/JFBuA0TRuRZ0NAqm8JHpp0)

This activity is supported by the Global Environment Facility (GEF) project ID: 9771 on Global Best Practices on Emerging Chemical Policy Issues of Concern under the Strategic Approach to International Chemicals Management (SAICM).
Implementation mechanisms of the Global Action Plan on HHPs. Part 1 – The targets of global action plan on HHPs and role of the stakeholders in the implementation mechanism

Highly Hazardous Pesticides Community of Practice

This activity is supported by the Global Environment Facility (GEF) project ID: 9771 on Global Best Practices on Emerging Chemical Policy Issues of Concern under the Strategic Approach to International Chemicals Management (SAICM).
• Further to the last HHP CoP discussion on 21 October 2020, that solicited input from various stakeholders on the draft Global Action Plan (GAP) on HHPs jointly developed by FAO, WHO and UNEP, this CoP discussion envisages to continue exchanging views on the GAP.

• The focus will be on the **targets and implementation mechanisms**. Of particular interest for this session is to consider the process for measuring progress towards the objectives and targets of the GAP until 2030.
• Draft FAO/WHO/UNEP Global Action Plan – October 2020
• Commenting period October-November 2020 (+400 comments)
• CoP on HHP: discussion on 21 Oct 2020
• FAO/WHO/UNEP stakeholder consultations on 6 Nov 2020
• Revised draft of GAP in Dec 2020 – Feb 2021
• Finalised version expected in March-April 2021.

• Presentation at ICCM5
  • If in 2022-2023: alternative launching process / other opportunities?
  • How to reach out to high-level audience in the meantime?
Introduction to Question 1

• Members of the HHP CoP are being asked to reflect on whether the Global Plan of Action could envisage to phase-out all/most/some HHPs used in agriculture by 2030, and if they think this is feasible or not, and if so why.
• What associated targets could be realistically set? As any plan of actions should be progressive, members are invited to suggest some possible milestones at given times by 2030.
Question 1

Would it be feasible to phase out all/most/some HHPs in agriculture by 2030?

What do you see as the realistic phase out targets and possible milestones (e.g. in 2 years, in 5 years, in 10 years)?

This question will be discussed for 20 minutes.
Please use chat only, mute your microphone, and turn your video off.
Thank you!

NOTE:
If you are having technical issues, please join the HHP WhatsApp group, using this link, and we will assist you; https://chat.whatsapp.com/JFBuA0TRuRZ0NAqm8JHpp0
• In addition to the development of the Global Action Plan on HHPs, members are asked to reflect on the on-going discussions as part of the post-SAICM framework on chemical management.

• As an identified issue of concern, how should HHPs importance be highlighted and how should activities be monitored in that framework. What could/should be done?
Question 2

Do you think that the post-2020 framework (SAICM) on chemicals should include a target and indicators on HHPs?
If so, give an example of a target and indicators, and how the data for these should be collected?

This question will be discussed for 25 minutes.
Please use chat only, mute your microphone, and turn your video off.
Thank you!

NOTE:

Introduction to Question 3

- One key component of the Global Plan of Action to mobilize and coordinate relevant stakeholders is to set up a HHP coalition.

- CoP members are invited to come up with ideas for the roles and engagement of stakeholders, and the operation of the coalition.
Further to the previous questions, ideas and suggestions will be welcomed about the mechanism to put in place at the national, regional and international level to assist with collecting relevant data (for indicators) and the role of the coalition partners in this regard.
Question 3

What do you suggest is the best way to promote engagement of key stakeholders?

Give examples of your understanding of an HHP coalition and how could it operate?

This question will be discussed for 25 minutes. Please use chat only, mute your microphone, and turn your video off. Thank you!
